Thermal Type Photo Control Socket LC-OCL

The lamp holder has an additional lighting control function so as to achieve automatically turning on or off the lighting fixtures according to the changes of natural light. The original designed lamp holder LC-OD can work with tungsten, fluorescent and LED lighting fixtures. Compared with the other lighting control lamp holders which can only be used with tungsten lighting fixtures, it can save 30-95% energy. It has obtained registered patent in the United States, China and other countries and also has been UL certified.

Model: LC-OCL

The LC-O series are screw-in type photo control, used under the rain-proof environment or for indoor use. Easy installation and removal. It functions as the automatical switch that turns on the bulb at dark and turns off at dawn.

SPECIFICATIONS AND CHARACTERISTIC • UL 496 Standard

•Rated Voltage: 120VAC (110V,127V) , 240VAC(220V,230V •Rated Load:

Code	Specification	
OCL1	120V/100W(LAMP DOWN),	150W
OCL2	240V/100W(LAMP DOWN),	150W

•Ambient Temperature: -40 °C to +70 °C

•Turn on Lighting Level: 10-16 Lux

•Turn off Lighting Level: < 65 Lux

·Housing: UV stabilized PC

·Action time: 30-180 sec

·Failure Mode: Fail ON

·Electrical Life: >5000 cycles
